

EntreComp is a comprehensive, flexible and multi-purpose guide to help users understand what is meant by entrepreneurship as a competence and be able to use this in their work. It is intended to guide actions to improve the entrepreneurial capacity of European citizens and organisations, and was launched in 2016 as part of the New Skills Agenda for Europe.

It creates a common understanding of the knowledge, skills and attitudes that make up what it means to be entrepreneurial - discovering and acting upon opportunities and ideas, and transforming them into financial, cultural, or social value for others. This is about being entrepreneurial in any situation: from school curriculum to innovating in the workplace, from community initiatives to applied learning at university.

EntreComp identifies the competences that make someone entrepreneurial, so that these can be understood and used to support entrepreneurial learning in different settings such as civil society, companies, education, youth work, community, start-up and among citizens.

At its very simplest level, it is a set of 15 competences grouped into three areas:

- (1) Ideas and Opportunities
- (2) Resources
- (3) Into Action

Fifteen competences of equal importance...visualised in a wheel, to provide an overview of the different yet interconnected competences.
